## PROFILE

DevOps engineer with 5 years of experience in Linux, Jenkins, Ansible, Git. Specialized in automating infrastructure activities for increased efficiency. Ensures continuous deployment using Jenkins. Hands-on experience with On-premise servers and AWS cloud services.

## WORK EXPERIENCE

**01/2023 – ongoing**
Pune, India

**DevOps Engineer,** *Minutus Computing Pvt. Ltd.*
*Client - Dassault Systems Global Services*
- Automated deployment processes utilizing *Infrastructure as Code* (IaC) with **Ansible**.
- Streamlined daily operational tasks through automation, leveraging **Jenkins** and **Shell scripting**, as well as custom **Python** and **PowerShell** scripts.
- Utilized **GitLab** as the *version control system* for efficient branch and tag management.
- Conducted in-depth analysis of **AWS** *cloud services*, **Docker**, and **Kubernetes** for potential migration activities.
- Established *server monitoring* through Prometheus **Grafana** to ensure system reliability and performance.

**08/2019 – 12/2022**
Pune, India

**Software Engineer,** *Tech Mahindra*
*Client - Telefonica, Germany.*
- Configured **CI/CD** pipelines in **Jenkins** to automate release installations and configured defect and error analysis for specific development branches.
- Developed **Java** functionalities for telecom applications, managing and optimizing multiple server modules for telecom clients.
- Created **Docker** containers to streamline CI/CD deployments through Jenkins, enhancing deployment efficiency.
- Produced solution design drafts for various Service Requests (SRs) and Change Requests (CRs), and utilized **Jira** to effectively track and manage project tasks and milestones.

## SKILLS

**CI/CD:** Jenkins

**Infrastructure as a Code:** Ansible, Terraform

**Scripting:** Shell, Python, Powershell
